1. Archduke Bartholomew von Fluffington the Third [Undercover Detective]

Jun 12, 2024, 01:46 PM

Detected Mood: 99.9% High Alert Sensory Vigilance & Red Dot Deep State Surveillance Assessment Protocol

Breed: Golden Retriever Mix with Welsh Corgi and German Shepherd Ancestry

Heritage: "This heritage exhibits intense focus, pastoral vigilance, and an uncanny ability to notice slight micro-shifts in kitchen treat cabinet topography over extended periods of observation."

"I have cross-examined the evidence across three separate time zones and four room quadrants. The red laser dot is not an earthly organism, but a classified interdimensional emissary sent to test my tactical reflexes. When the human clicks the metal treat can, soundwaves reverberate at precisely 440 Hertz, establishing a psychic treaty. We cannot compromise."

Visual Clues: Ears angled at exactly 45 degrees towards kitchen threshold Snout vibrating in Morse code pattern Pupils dilated during suspicious treat jar inspection Weight shifted strategically onto left rear paw

Owner Note: "Observed this deep contemplation while opening the refrigerator. He refused to look away until I surrendered a slice of provolone cheese."

Prescribed Action: Maintain perimeter watch, offer dehydrated beef liver as a diplomatic peace offering, and inspect the curtains for hidden surveillance bugs.
